
LAB SYSTEM

LAB SYSTEM THE MOST MODERN IMAGE OF OPERATIVE OFFICE

Lab System is the most contemporary representation of the operative office. A perfect synthesis of operative, ergonomy and design, with numerous furnishing solutions, from a simple rectangular desk to double and multiple workstations and modern bench tables. The rectangular sectioned metal structure is surprisingly easy to assemble assuring great sturdiness to tables, compositions and working areas, integrating simple and safely with alternative supporting elements. The structure is available in titanium, white, shiny black and silver finishing, conferring an appealing look which combines with the melamine and glass tops as well as the accessories, offering a wide choice of compositions and numerous styling solutions. Lab System creates in a simple and essential way a wide variety of so-lutions by using accessories, bookcases, pedestals and containers. The linear and essential design integrates perfectly with every environment achieving brilliant results in terms of aesthetics and functions

The minimal appeal of the metallic structure renovates itself in the ring shaped leg version. Evolution of the traditonal U leg, the new proposal is elegant and representative and it can find place in operative or mid executive locations. The simple shape of the structure and significant technical details assure the assembly of each workspace in a quick and simple way. The final result is characterized by a remarkable stability and sturdiness. The numerous finishings of the metal parts and the various possibilities of choice of the work tops allow a wide and completely customization. A particular attention has been reserved to the choice of the Extra Light glass tops, 12 mm thick. The colours white and black of the glass are perfect to make the workstations precious, elegant and bright. Lab System represents a new way to see the modern operative and professional office without aesthetic compromises or compositional limits.

The melamine tops match perfectly with the structure in all its colours. With Lab System range it is simple to create a complete office choising between lots of pedestals (fixed or on wheels) and bookcases conceived for a chromatic and functional integration.

The desk height pedestal is a valid support for a comfortable and efficient work desk. The pedestal can contain a great number of documents as well as replace a metal leg of the structure.

The metal returns have a refined line with a 45° profile which delineates the space of the doors. In the fixed version the return becomes a supporting element to the desk by using a short leg.

100 ARTISTS
(ART)IFACT
TAKE ONE
LOGOTYPE BLACK

The modular returns have a white melamine structure and they can be aligned or freely orientated. Designed as desk support they create compositions of every dimension and they have to be always fitted with top and rear.

o The versatility of Lab System gives the option to create numerous compositions of every dimension. The melamine desk height bookcases (open or with doors) offer the possibility to have innovative and original workstations.

The versatility of Lab System is at the base of numerous proposals of double compositions. Using the metal or melamine returns, it is possible to create original and functional workspaces for 2 or more workers. In this case, the desk has a leg of standard dimensions and one leg of reduced height that can be integrated with the supporting returns. When the supporting returns are integrated with the workstations, they increase the functionality of the desks helping the worker in the using of technological devices. (personal computer, tablet, printers, scanner etc). Double compositions are also feasible aligning some traditional tables, using a solid central leg that can be transformed, if necessary, in an electrical cables compartement.

LAB SYSTEM DOUBLE DESK SOLUTIONS

Lab System includes a wide range of cable access systems. Cable grommets, cable trays, they are all thought to be integrated functionally and aesthetically.

The modular returns have a white melamine structure and they can be aligned or freely orientated. Designed as desk support they create compositions of every dimension and they have to be always fitted with top and rear.

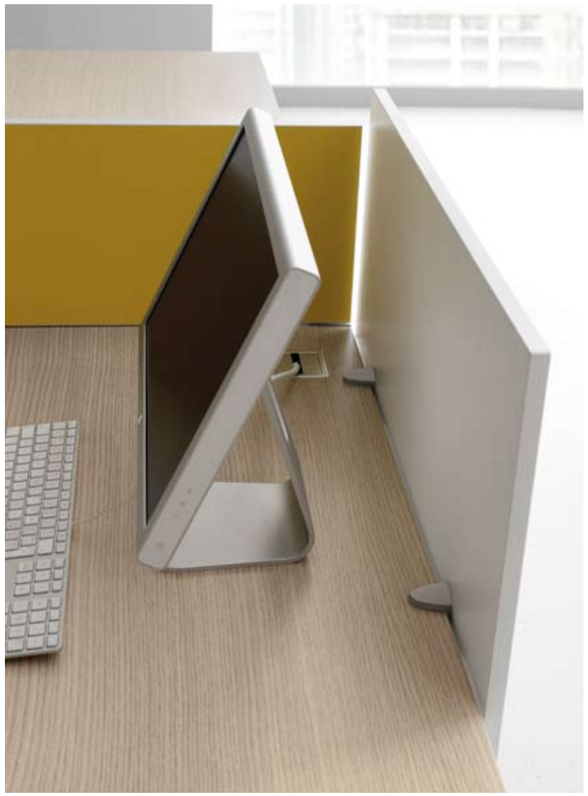
The structure of the tables Lab System allows for the insert of front panels for a better privacy of the desk. The central leg gives the possibility to connect aligned tables in order to make a multiple and functional workstation.

The metal suspended pedestal is hooked to the structure, allowing the running along the length of the top. The central leg can also have a closing panel for cable collection.



Lab System bench tables realize multiple workstations with solid metal structure. Wide, comfortable and functional, the bench workstations represent the heart of every operative office of latest generation. The structure of the bench has normal or ring shaped leg and a central “space-saving”leg that allows the using of the work top in all its length. One of the legs of the structure can be replaced by desk height supporting pedestals. A wide range of accessories allows to isolate every workstation assuring privacy and integration: screens, cable port, CPU holder and flip access for electrification. The various finishings of the structure, of the tops and the accessories allow to customize the bench to integrate it in every operative setting.

LAB SYSTEM MULTIPLE DESK SOLUTIONS

The cable collection on the bench tables Lab System is made through a tray anchored to the structure and by flip melamine panel which allow for a fast and practical cable inspection.

The Lab system proposals for meeting area are characterized by simplicity and linear shapes. The strong structure in metal tubular draws table of every dimension joining the finishings of the metal with the sober shades of the melamine and the bright glares of the glass. The meeting tables are available with square or rectangular shape. They are fitted to be connected to the tops of the same kind to obtain modular meeting tables of big dimensions. The central leg gives stability and sturdiness to the compositions. The tops and the structures are fitted for the pass and collection of the cables, by the using of cable port, trays and an original metal cable collection column. Lab system meeting tables are extremely versatile, functional and aesthetically appealing.

LAB SYSTEM MEETING AREA SOLUTIONS

The modular meeting tables employ the central leg to improve the space to give a total utilization of the table. To allow the cable passage it is also included in the system a metal tray and tower.

Velo is the dividing system studied for the perfect integration with Brunoffice operative systems and for realize original reception workstations. Wall system 25 mm thick is available in melamine, melamine covered with fabric or methacrylate with aluminium profile. The range includes 3 heights (105, 151, 177 cm) and 3 widths (60, 80,100 cm). It is fitted with an aluminium perimetral profile and a central profile always placed at 70 cm height in order to allow the connection of the desk tops.Each panel is fitted with 2 adjustable feet and accessories to connect to other panels directly. The system can be easily customized on request both as reception and wall system for operative workstation.The system is not self supporting so it needs to be always attached to a table , bookcase or other panel.

LAB SYSTEM + VELO: INTEGRATED OFFICE

The screen system Velo represents the simplest and most immediate answer to office space dividing. Thickness 25 mm, various heights and widths, this dividing system is always fitted with an aluminium profile which guarantees the connections to desks and accessories.

MELAMINE BOOKCASES

Lab system, as all operative Brunoffice ranges, use bookcases and elements studied for a perfect chromatic and dimensional integration.
The bookcases have a structure in white or grey melamine, while the doors and fronts are available in glass and in all the finishings of the system. The top of the bookcase (compulsory) and the side panels (optional) are available in all the colours of the range. The handles can be chosen between the ones available on the price list.

MOBILE PEDESTALS

Lab system, as all Brunoffice operative ranges, use pedestals on wheels studied for a perfect chromatic and dimensional integration.
There are 2 kinds of operative pedestals: with structure and fronts in metal and melamine top or with structure and top in metal and fronts in melamine. Drawers run on reliable and solid ball bearing slides always fitted with rollaway wheels. The handles can be chosen between the ones available on the price list.
